

The facts about identity theft, fraud, and wealth protection

The number of identity theft and fraud victims in the United States hit a 15-year high in 2017 and is projected to rise. Learn how age impacts risk and about the emotional impacts of becoming a victim. Proper wealth protection starts with understanding modern fraud and the hazards it can pose.

In **2017**, the number of identity fraud victims in the U.S. reached its highest levels in nearly **15 years**, according to Javelin Strategy & Research.

16.7 million

U.S. consumers were victims of identity fraud, amounting to \$16.8 billion stolen in 2017.¹

4.8 billion

Records were lost in 2016 data breaches – and hackers were responsible for more than half of these breaches, according to the Privacy Rights Clearing House.²

2 billion

Internet users have had their personal information compromised, according to McAfee.²

Generational identity theft and fraud risks

Baby Boomers

35% of fraud complaints and 19% of ID theft complaints impacted Americans ages 60 or older in 2017, according to the Federal Trade Commission (FTC).³

Seniors can be seen as both trusting and less tech-savvy, which fraudsters attempt to exploit.

Millennials

Millennials are nearly **three times** more likely than Baby Boomers to fall victim to a financial phone scam and experience a financial loss, according to First Orion.⁴

Millennials' extreme comfort with technology can lead them to share more personal information than they should.

Children

More than **one million** children fell victim to identity theft and fraud in 2017, and 66% were under the age of 7 when it occurred, according to Javelin Strategy & Research.¹

Children have little financial or credit history to start, and fraudsters can use their identities for long-term theft.

The facts about identity theft, fraud, and wealth protection

Emotional impacts of fraud

Identity fraud can have long-lasting impacts beyond financial recovery, according to the Identity Theft Resource Center.⁵

- 66% of identity fraud victims reported feeling violated by the attempted theft, and 58% report feeling vulnerable because of the theft.
- One-quarter of victims sought professional emotional help after falling victim to identity fraud.
- Identity theft victims report experiencing stress (64%), sleep disturbances (48%), and an inability to concentrate (37%).

Taking the first steps to fighting fraud

The good news is there are a few simple steps families can take now to ensure their personal and wealth information is as secure as possible.

- Check your bank statements as soon as you receive them.
- Review your credit reports and scores annually, if not more often, and look for signs of fraudulent activity.
- Contact national credit bureaus to place credit file freezes for yourself and your family.
- Set up fraud alerts on you and your family members' credit reports.
- Work with your advisor to determine your need for and gain access to cyber insurance based on your exposure.
